

Bio Toilets

Price Range
Starts From
₹ 20000

Bio Toilets

The normal septic tanks produce an effluent with high percentage of pathogens. The high pathogen count in drinking water will affect the health and cognitive development of children. Worldwide, 5.3% of all deaths and 6.3 % of disabilities are caused by poor sanitation, hygiene and water. One in every ten deaths in India is linked to poor sanitation and hygiene.

Verde brings to you **BIO TOILETS** a Highly Innovative technology for disposal of human waste in an ecofriendly manner. All the disease causing pathogens are totally eliminated, and the effluent can be drained to any surface without any environmental hazard makes this Innovation stand out from other common Toilets.

The Technology

- 100% nonenergy intensive process.
- The system can be made operational in a few hours.
- The system requires no manual intervention, " you can fit it & forget it"
- All the disease causing pathogens are totally eliminated, and the effluent can be drained to any surface without any environmental hazard.

Features

- No repeated dosing of bacteria is required.
- Suitable for Mobile Toilet applications
- 100% maintenance free, continuous biological process.
- Economically viable.
- No need of connectivity to the sewage line, septic tank
- Routine cleaning chemicals like Phenyl, soap, Kerosene etc. do not harm Bio Toilet or the inoculums.
- Suitable for sub zero temperature of Himalayan Region, Hill Stations, Railway coaches, Buses, Highways, Remote areas,
- Beaches, Sea ports, Mining area, Metro cities etc
